

What you need

1. Cotton balls – about 20-25 per child
2. Blue construction paper – 1 sheet/child
3. Googly eyes
4. Black marker
5. Black Construction paper
6. Small twigs for the hands

Directions:

Taking 4-5 cotton balls, pull them apart and stretch them to build the snowman. Glue down. Then take the black construction paper and make a snowman hat out of it. Glue on snowman's head. Then take about 10 cotton balls and glue on the base of the construction paper to make it look like snow is building up. Finally, take one cotton ball and break it into smaller pieces, gluing it in scattered places on the construction paper.
